

Signs & Symptoms of Childhood Cancer

Early detection can save lives. Trust your instincts and talk to your child's doctor if something feels off.

Together, we can make a difference—one child, one family, one checkup at a time.

New Lump or Swelling

(neck, chest, armpit, leg, belly)

Ongoing Fatigue, Paleness

(with no reason)

Easy Bruising, Bleeding, or Blood in Urine

Recurrent High Fevers or Night Sweats

Recurrent, Severe Headaches

(and/or morning vomiting)

Sudden Eye or Vision Changes

(cross eye, blurry vision, or bulging eye)

Unexplained Weight Loss

(persistent nausea, constipation, or stomach bulging)

Pain or Limping Without Injury

(often mistaken for growing pains or sports injury)

A White/Cloudy Pupil In Flash Photos
